Professional Summary

Computer Science and Engineering graduate with experience in software development and building end-to-end applications. Skilled in C, C++, JavaScript, Linux fundamentals, data structures, algorithms, object-oriented programming, and software engineering principles. Experienced in developing REST APIs, implementing authentication systems, integrating databases, and debugging applications. Interested in system-level programming, distributed systems, software debugging, and scalable software development.

Technical Skills

- **Programming Languages:** C, C++, JavaScript (ES6+)
- **Operating Systems:** Linux
- **Core Concepts:** Data Structures, Algorithms, Object-Oriented Programming (OOP), Process & Thread Fundamentals, Software Debugging
- **Software Development:** REST APIs, Authentication & Authorization, Client-Server Architecture
- **Frontend:** React.js, HTML5, CSS3, Responsive Design
- **Backend:** Node.js, Express.js
- **Database:** MongoDB
- **Networking Fundamentals:** TCP/IP, HTTP/HTTPS
- **Tools:** Git, GitHub, VS Code

Projects

SkillSwap – Peer-to-Peer Skill Exchange Platform

GitHub — Live Demo

React.js, Node.js, Express.js, MongoDB, JWT, bcrypt, Axios, Vercel

- Built a full-stack skill exchange platform enabling users to offer, discover, and exchange skills.
- Implemented secure JWT authentication, protected routes, and password hashing using bcrypt.
- Developed skill search, swap request management, messaging, and review functionality.
- Designed RESTful APIs and optimized client-server communication using Axios.

DeadlineDock – Smart Deadline & Task Manager

GitHub — Live Demo

Node.js, Express.js, JWT, Chart.js, FullCalendar, JavaScript, Render

- Developed a task management application with secure authentication and deadline-based prioritization.
- Implemented Pomodoro mode, notifications, drag-and-drop task workflow, and gamification features.
- Integrated Chart.js and FullCalendar for productivity tracking and task visualization.
- Built scalable REST APIs and optimized backend performance for smooth user experience.

SideBySide – Structured Debate Platform

GitHub — Live Demo

React.js, Node.js, Express.js, MongoDB, JWT, Vite, Vercel

- Built a full-stack debate platform supporting structured two-sided discussions.
- Developed voting, moderation, reporting, and content management functionality.
- Implemented role-based access control for user and admin operations.
- Designed scalable APIs and responsive interfaces to improve user engagement.

Education

Bachelor of Technology (B.Tech) in Computer Science & Engineering

2026

Bhagwan Mahavir University (BMU), Mahavir Swami College Of Engineering And Technology

CGPA: 6.64 / 10

Diploma in Computer Science & Engineering

2023

Gujarat Technological University (GTU), Bhagwan Mahavir Polytechnic

CGPA: 6.59 / 10
